| Think quality. Think harford.

| Think quality. Think harford.

- Fits any excavator 1,650lbs to 30,850lbs
- Perfect for mixed rental fleets, buckets are interchangeable with the Safelock coupler
- Easy install, easy operation, zero tools and quick-change attachments
- Made from premium grade materials for durability, reliability & low maintenance
- Specified by OEM's for over 20 years as the rental coupler of choice.

Excavator Weight	Safelock System
1,650 - 4,400lbs	SL 10
4,400 - 6,600lbs	SL 30
6,600 - 19,800lbs	SL 35
19,800 - 30,850lbs	SL 50

How it works - 3 easy steps

Step 1	Retract the safety pin, release & fully open the safety handle.	
Step 2	Engage the "C" shaped jaw with the front attachment pin, crowd & lift the attachment until firm contact is made with rear locking plate.	
Step 3	Retract the safety pin, fully close the safety handle & release the safety pin to lock in position.	

1

Perfect for mixed rental fleets, buckets are interchangeable between excavators.

2

Easy to install and operate. Zero tools, low maintenance, great ROI.

3

Zero impact to breakout force. Quick-change attachments reduce excavator downtime.

4

Best-selling coupler for rental fleets. Durable, reliable, premium quality product.
